

Managing on Square Wheels

Could your business be moving forward on square wheels?

(Half Day Interactive Session)

Mila will show you how to stop the wagon and change the wheels.

Hands-on Effective Empowering

Are you frustrated with the pace of progress in your business? Many organizations discover that they could be operating more effectively when they take time to use the *Square Wheels® One* business tool. Cartoons are used as metaphors for addressing organizational development issues.

This gives your team the opportunity to:

- Identify the practical issues and concerns that prevent moving forward efficiently.
- Discuss the impact on productivity.
- Select the wheels with the biggest impact.
- Find innovative solutions.
- Commit to action

Best managers are very good at communicating needs and involving and engaging people in the organization's key initiatives. They encourage team-based problem solving and solution generation. *The Square Wheels* tool will do just that for you. **Mila** has the expertise to design an intervention that increases the productivity of your workforce. *The Square Wheels* tools are excellent either as a half day interactive programme or multi-day program theme or as "spot color" to help illuminate a specific issue. Used in conjunction with the new game *The Collaboration Journey* we can get your team talking!

"A few years back, Toyota asked employees for ideas on how they could become more productive. They received only a few suggestions. They reworded the question to 'How can you make your job easier?' They were inundated with ideas. Even tiny changes can lead to unpredictable, cataclysmic results."
